

EUROTEK

Pneumatic Shears Series SLK-30

Pneumatic shears SLK-30 series, developed and tested for cutting electrical cables
Iron / Copper bar - Metal Sheets.

The **shears SLK-30 series** guarantee a fast, practical and economical job.

The shears use a pneumatic circuit in compliance with the 626 normative.

For a regular running, all is needed is a compressor with continuous pressure supply at 7 atm.

The **shears SLK-30 series** are strong, reliable,
and can be used for all appropriate purposes, including the most demanding works,
and do not require any particular maintenance.

fast - easy to use - economical

SLK-30-C - Pneumatic Shears for Electrical Cable

Developed and tested for cutting electrical cables up to 30 mm thick multipolar cables -
28 mm soft unipolar cables - 22 mm rigid cables.

Specifications apply for cables coated with rubber or PVC protective sheath.

SLK-30-C-EVO - Pneumatic Shears for Electrical Cable

Developed and tested for cutting electrical cables up to 50 mm thick multipolar cables -
32 mm soft unipolar cables - 22 mm rigid cables.

Specifications apply for cables coated with rubber or PVC protective sheath

EUROTEK

SLK-30-IB - Pneumatic Shears for Iron Bar Cutting

Developed and tested for cutting iron construction bars of 6,5 mm (iron construction bar) - 5 mm (stainless steel) - 6 mm (C40 iron) - 7 mm (Wire)

SLK-30-CB – Pneumatic Shears for Copper / Iron Bar

Developed and tested for cutting copper bars of:
15 mm (Copper bar) - 10 mm (C40 Iron Bar)

SLK-30-MS Pneumatic Shears for Iron Sheets

Developed and tested for cutting Iron sheets of Iron C40 - 100 mm cut length - 2 mm of thickness

EUROTEK s.r.l., Lanciano (CH), 66034, Italia.
